

Peri Care & Barrier Protocol

Maintenance & **post incontinence**. Skin friendly and safe for mucous membranes. Non toxic, non rinse.

USE: Apply Theraworx Protect after each incontinence episode and PRN.

After incontinence episode, remove debris in accordance with facility protocol. Apply Theraworx Protect with a gloved hand or cloth following directions for peri care and barrier support below. Allow to air dry. No rinse needed.

Peri Care

8oz Foam Application System:

order# HXC-08Z

1 After debris has been removed, apply 1-2 pumps of Theraworx Protect to meatus and perineum area. Finish front to back for women and around the glans penis for men (see illustration "1st application area").

2 Apply to all areas from the umbilicus to the mid-thigh, including skin folds and rectal area (see illustration "2nd application area"). Allow to air dry. No rinse needed.

Barrier Support

8oz Foam Application System:

order# HXC-08Z

1 Apply 1-3 pumps of Theraworx Protect to all areas needing protection from urine and feces. Typically from low back to above the knees (see illustration). Allow to air dry. No rinse needed.
