

INSTRUCTIONS FOR USE

Theraworx Protect® Foam Total Body Bathing

The no-rinse, no-basin, total-body bathing foam. *Theraworx Protect* is safe for use on the skin including sensitive areas. It should be applied all over the body, including the face, groin area and genitals.

Precautions:

Not intended for oral use or ingestion. If redness or irritation occur, discontinue use. May cause eye irritation. If eye contact occurs, rinse thoroughly with water.

Instructions For Use: Total Body Bathing

- **Step 1:** Dispense 3-4 pumps of foam into a gloved hand, apply liberally to the first area (1): face, neck, chest and abdomen.
- **Step 2:** Gently massage the foam into face and neck using circular motions. **Do not rinse. Allow to air dry.**
- **Step 3:** Reapply 3-4 pumps of foam and proceed to bathe areas 2-8, reapplying foam between each section.

Note: It is recommended to change gloves after step 3 (armpits) and step 7 (buttocks, anus) to prevent cross-contamination.

Instructions For Use: Single Area Use

Dispense 3-4 pumps of foam into a gloved hand or disposable cloth, apply liberally on the affected area, and massage gently until dry.

For cleansing urine and fecal matter in a hospital setting

Initial Cleansing:

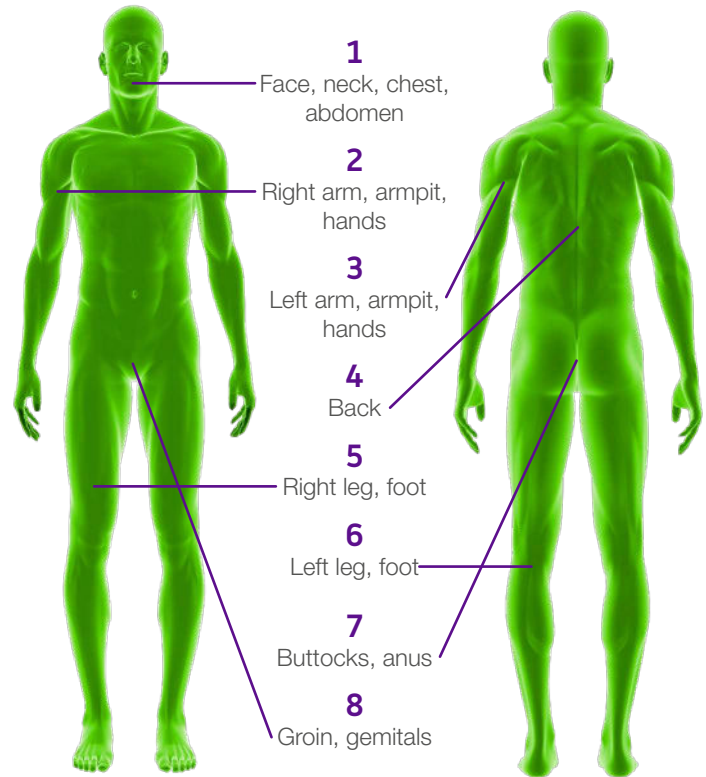

1. If urine and fecal matter is present, gently cleanse the affected area wiping front to back in a single direction to prevent cross-contamination.

Follow-Up Application:

1. After initial soil removal, reapply foam to a fresh disposable cloth or directly to the skin.
2. If applicable, gently wipe the area again to ensure thorough cleansing and to leave a residual protective barrier.
3. Do not rinse.

The foam is leave-on and formulated to maintain skin integrity without the need for rinsing.

Note: Always follow your facility's infection prevention and incontinence care protocols.
